SUMMARY

Full-Stack Web Developer with hands-on experience in MERN stack development, specializing in building scalable and high-performance web applications. Proficient in React.js, Node.js, NestJS, MongoDB, and SQL, with strong expertise in RESTful API development, authentication, and role-based access control (RBAC). Experienced in developing user-facing interfaces and admin dashboards, with a focus on clean code architecture, performance optimization, and maintainability. Comfortable working with Git-based workflows, deployment pipelines, and agile development environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Bootstrap, Tailwind CSS, Redux Toolkit

Backend: Node.js, Express.js, NestJS, RESTful APIs, MVC Architecture, Repository Pattern

Databases: MongoDB, SQL, Supabase

Authentication: JWT, Google OAuth, Role-Based Access Control

Real-Time: WebSocket, Socket.IO, WebRTC

Cloud & Deployment: AWS (S3, EC2), Nginx, PM2, Render, Vercel

Tools: Git, GitHub, Postman, Swagger, Figma

Payment Integration: Razorpay, Stripe

PROFESSIONAL EXPERIENCE

Web Developer

Sep 2025 - Jan 2026

Al Qoba Al Zahabia Technology

Dubai, UAE

- Developed full-stack web applications using Next.js and NestJS frameworks
- Built and maintained RESTful APIs and backend services with focus on performance and scalability
- Integrated Supabase for database management and authentication systems
- Implemented responsive user interfaces using modern frontend best practices and reusable components
- Applied clean code principles and modular architecture for maintainable software solutions
- Debugged, tested, and optimized application performance across multiple projects
- Collaborated with team members in agile development environment using Git version control

PROJECTS

Real-Time Dating Platform

[GitHub](#)

- Developed a full-stack dating platform with real-time matchmaking, chat, and video call features
- Implemented WebRTC for video calling and Socket.IO for real-time messaging functionality
- Designed subscription-based model with Razorpay payment gateway integration
- Built RESTful APIs using Node.js and Express.js with repository pattern for clean architecture
- Created responsive frontend with React.js, TypeScript, and Tailwind CSS
- Managed state using Redux Toolkit and implemented JWT authentication with role-based access
- Deployed on AWS EC2 with Nginx reverse proxy and PM2 process manager
- Technologies: React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Redux, Tailwind CSS, AWS, Nginx
- Improved application performance and scalability through MongoDB indexing, optimized queries, and concurrent user handling

Article Feeds Web Application

[GitHub](#)

- Developed content management platform where users can create, edit, and manage articles
- Implemented user registration, login, and personalized dashboard functionality
- Added features for liking, disliking, and categorizing articles
- Technologies: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT

Aadhaar OCR System

[GitHub](#)

- Built OCR application for extracting information from Aadhaar cards using Tesseract.js
- Developed user-friendly interface for uploading documents and viewing extracted data
- Technologies: Next.js, Node.js, Express.js, Tesseract.js, Tailwind CSS

EDUCATION

Brototype

2023 - 2025

MERN Stack Development Certification

- Completed intensive training in full-stack web development using MERN stack
- Built multiple production-ready web applications following industry best practices

Kannur University

2019 - 2022

Bachelor of Science in Computer Science

- Coursework: Data Structures, Operating Systems, Web Development, Software Engineering
